EDUCATION

Under graduate

B.E. Computer Science Engineering
Madras Institute of Technology
Jan 2024 – 2028

SKILLS

- #C
- C++
- Excel
- Problem Solving
- Java
- Web Development
- Data Structures
- SQL
- Algorithms

CAREER OBJECTIVE

Motivated Computer Science undergraduate from Madras Institute of Technology with strong programming skills in C, C++, and Java. Good understanding of data structures and web technologies. Adaptable team player with analytical thinking and communication skills, seeking an opportunity to apply technical knowledge in a professional environment.

PROJECTS

- Developed C, C++(Mini Projects),basic desktop applications using Java AWT and Swing.
- Participated in **Smart India Hackathon 2025 (Intra-College Round)** and developed a Face Recognition API-based attendance system for schools. The system automates student attendance using real-time facial identification, improving accuracy and reducing manual effort.
- Developed basic full-stack web development projects including a simple website, Student Management System, To-Do List application, and a Calculator to strengthen foundational programming and web development skills.
- Built a responsive personal portfolio website to present my projects, technical expertise, and accomplishments, ensuring a clean user interface and optimized performance across devices.

Leadership & Activities

National Service Scheme (NSS) Volunteer

- Participated in NSS special camps and contributed to community development, social outreach, and environmental awareness initiatives.
- Showcased leadership, teamwork, and commitment to social responsibility through active involvement in camp programs and public service activities.

HOBBIES

Cricket
Chess
